

# Family Caregiver Scope Document

The following document is intended to outline the features, layout, and capabilities of the Family Caregiver Online Test Module.

## Overview

The Family Caregiver Online Test Module (“module”) is an online test that users progress through in an effort to learn more about caregiving. The test consist essentially 3 parts:

1. Pre-test
2. Content
3. Post-test

Each of the three sections will be explained in more detail below. The pre and post test are identically and thus will be combined into a single explanatory section.

---

## Pre/Post Test

The pre and post test are identically in questions and functionality. They are shown at the beginning of the module and at the end. The pre and post test which will be refereed to as the “test” since they are identically consist of 10, static, multiple choice questions.

Functionality points:

- If a question is answered correctly, the answer font will change from black to green.
- If an answer is incorrect, it will change font color from black to red. Also, if an answer is incorrect, helpful text will be shown above the question explaining the correct answer. These helpful text sentences will be hardcoded and provided by the client.
- After a question is answer the user cannot change their answer.
- Users answer will be gathered from both the pre and post test and compiled into an email and sent to a provided email address.
- Answers will be selectable by a radial button.

## Content

The “content” of the app consist of text, videos, and free response text boxes that are moved through between the pre and post test. The content will consist of 7 different “sections”. Each section is slightly different but will be defined more below. Some modules will require the user to watch a video or answer questions before moving to the next section.

The three main components that are included throughout the sections are:

1. Text - Static content provided by client
2. Video - YouTube videos that will be embedded and links provided by client
3. Freeform answers - Text boxes that users are able to input freeform text. After a user has answered all freeform text boxes there will supplemental text shown below each text box. This supplemental text will be static and provided by client. The answers in the free form boxes are not captured or stored in any way.

*Both the pre and post test are considered “sections” so content sections will begin with “Section 2” and end and “Section 8”.*

Section 2: Introduction and Learning Outcomes:

- This section consist of text and a youtube video.

Section 3: Family and Communication Patterns

Section 5: The Manager Caregiver

Section 6: The Carrier Caregiver

Section 7: The Partner Caregiver

Section 8: The Lone Caregiver

- This section consist of test, video, and freeform answer boxes.

Section 4: Preview of the Four Family Caregiver Types

- This section is strictly static text
